## Property Details

<b>Location</b>	Generally located north of the intersection of Copper Hill Drive and Benz Road in the area of conceptual Greenbelt and Linkages of the City of Santa Clarita's Open Space Program.
<b>Municipality</b>	The property is in the unincorporated County of Los Angeles on the northern boundary of the City of Santa Clarita.
<b>Assessor Parcel Numbers</b>	238-010-002, -003,-008, 3244-031-013, -014, 2812-007-001,-002,-028,-045
<b>Ownership</b>	Santa Clarita Investors II, LLC and Santa Clarita Investors, LLC
<b>Condition</b>	The property is currently un-entitled. The Seller had started processing entitlements (VTM #s 47760 and 43589) but has not yet gained approvals.
<b>Natural Features</b>	<p>The site is near the junction of the Transverse and Coastal mountain ranges and includes elevations from 1,392 to 1,983 feet. It is within the rain shadow of the San Gabriel Mountains and Coast Range, placing it within the climatic transition zone from the moister coastal region to the more arid inland region. Valley and coast live oak woodlands and savannas, riparian woodland, chaparral, coastal sage scrub and grass lands compose the natural biotic communities in the region. Sensitive biological resources in the area include 22 plant species, 50 wildlife species and 15 habitat types.</p> <p>Site topography includes rolling hills on the southern portion and very steep hills on the northern portion. Haskell Canyon forms the western edge of the property; the southern extension of Del Sur Ridge makes up the eastern edge of the property. Several tributary canyons run westerly from the Del Sur Ridge into Haskell Canyon; Haskell Creek runs to the Santa Clara River.</p> <p>Six primary plant communities are found on the northern property including coastal sage scrub (247 acres); chamise chaparral (76 acres); scrub oak chaparral (64 acres); Riversidean alluvial fan sage scrub (15 acres), mixed chaparral (15.89 acres) and non-native grasslands/ruderal (32 acres). There are four main plant communities found on the south property including coastal sage scrub (55 acres), mule fat scrub (.13 acres), fourwing saltbush scrub (10 acres) and disturbed (7 acres) There are areas of USACE jurisdictional stream course and CDFG jurisdictional areas on the north and south properties.</p>
<b>Comments</b>	Buyer shall receive all studies and reports generated by Seller including: Title Report; Soils Report; Environmental Analysis; Topo Maps; Drainage Studies and other information as required.
<b>Property also Offered for Development</b>	Land Conservation Brokerage, Inc is marketing the property to potential conservation and mitigation buyers only. If you are interested in purchasing the property for development purposes, we will refer you to our colleague Park Place Land Advisors.
